**SUPPLEMENTAL INFORMATION DISCLOSURE**  
**STATEMENT UNDER 37 CFR 1.97(b)(4)**

SIR or MADAM:

An information disclosure statement pursuant to 37 CFR 1.97(b)(4) for the patent application identified above together with a request for continued examination (RCE) was timely submitted to the Patent and Trademark Office by mail with a certificate of mailing on

14 October 2004. Nineteen patents and publications broadly related to the field of the invention of the application were identified on a Form PTO/SB/08 accompanying the information disclosure statement. A full copy of each of the nineteen items identified on the Form PTO/SB/08 was submitted with the information disclosure statement of 14 October 2004 with the exception, as specifically noted in the statement, of United States patent documents and one item which was marked on the Form PTO/SB/08 with an asterisk; namely, the following publication for which only an abstract was submitted:

SKINNER, J. A., *et al.*, "Misincorporation by AMV reverse transcriptase shows strong dependence on the combination of template and substrate nucleotides," *Nucleic Acids Research*, (1986), pages 6945 – 6964, Volume 14.

The purpose of the present supplemental information disclosure statement is to provide a full copy of the SKINNER, J. A., *et al.* publication identified above and to bring to the attention of the Patent and Trademark Office the following two patent documents which are identified on the accompanying Form PTO/SB/08:

United States patent No. 5,310,893 to ERLICH, H. A. *et al.*, and

European published patent application EP 0 329 311 A1 in the name of  
MEDICAL RESEARCH COUNCIL.

A copy of the European '311 published application is being submitted with this supplemental information disclosure statement. Copies of United States patent documents are no longer required to be provided with information disclosure statements.

French patent FR 2,650,840 ("the French '840 patent") identified on the Form PTO/SB/08 accompanying the information disclosure statement of 14 October 2004 was provided in English translation only. Published PCT patent application WO 91 02087 ("the PCT '087 published application") also identified on the Form PTO/SB/08 accompanying the 14 October 2004 information disclosure statement was in French without an English translation. However, the PCT '087 published application identifies on its face as a priority application

Applicants: SODERLUND *et al.*  
Serial No.: 08/465,322  
Filed : 5 June 1995  
Page 3

French patent application 89/10802, which the translation of the French '840 patent indicates is the application which matured into the '840 patent.

The attorneys for the applicants take no position on whether or not any item listed on Form PTO/SB/08 constitutes prior art against the subject application under any particular provision of Title 35 of the United States Code.

No Office Action on the merits has been received subsequent to submission of the request for continued examination (RCE) for the subject application on 14 October 2004. It is therefore assumed that no such Office Action has been mailed and that consequently under 37 CFR 1.97(b)(4) no official fee is due for submission at this time of the present supplemental information disclosure statement. If an Office Action on the merits has in fact been mailed or if any fee is otherwise required for submission of the present supplemental information disclosure statement, please charge such fee to deposit account No. 11-0171.

Respectfully submitted,

Attorneys for the Applicants
